# Introduction

The aim of this testing phase was to meticulously review the user interface, specifically focusing on font, text navigation, and icons. The goal was to identify and document any bugs or inconsistencies in these crucial design elements.

Testing Overview:

Focus Areas: Font rendering, text navigation, and icon display.

Testing Methods: Manual inspection and interaction with the user interface.

Bugs:
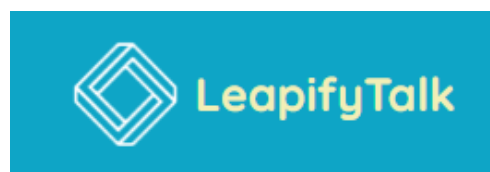

Text colorful

Label is too light

Mental health is an issue that is increasingly becoming more prevalent in our society. With the high cost of traditional therapy and the lack of availability of in-person therapy, it has become increasingly difficult for many people to access therapy. Leapify Talk is a software as a service teletherapy platform that provides virtual therapy sessions that are customized to each user. It is a platform that is easy to access and is designed to help certified therapists and their clients get the most out of each virtual therapy session.
